**Ingram Content Group Grows E-Book Profiling
on OASIS Library Platform**

NASHVILLE, TN – **Ingram Content Group Inc.**, today announced it will expand the e-book profiling capabilities available to libraries on its **OASIS**® platform with the integration of content from other publisher platforms and e-book aggregators.

Libraries can currently select **EBSCO** titles from Ingram's OASIS platform for firm order purchase. In February, libraries will also have the ability to include EBSCO e-book content in their approval, slip and Patron Driven Acquisition (PDA) programs.

"We sell e-book content through numerous channels to give our library customers purchasing flexibility," said **Ken Breen**, Vice President Product Management, EBSCO eBooks. "Ingram's enhanced profiling capability on their OASIS platform will give libraries the relevant tools they need to select and purchase e-book content from multiple vendors from one location in their desired workflow. We are pleased to participate."

Profiling and PDA tools for additional aggregators are expected to be added in the 1st quarter of 2014.

"Through our work with EBSCO, libraries have access to one of the most comprehensive collections of e-books, and soon will have enhanced title profiling tools to drill down and find the relevant content they're looking for," said **Dan Sheehan**, Vice President and General Manager, Ingram Library Services. "Our goal is to make it easy for libraries to find the content they need from one source, and through collaborative efforts with leaders in the library community, they can do that on OASIS."

The OASIS platform, Ingram's academic content platform for its library company Coutts Information Services, is a comprehensive online library interface for bibliographic information and searching, book and e-book acquisition, collection development and workflow management. Through the OASIS platform, libraries are able to access a database of millions of titles; search, select and manage orders online; download records,

including no-cost MARC downloads; monitor standing orders; manage approval plans and new title notification plans; track orders and access reporting information.
